

Toufic Shoukeir

Computer Networks for Engineers

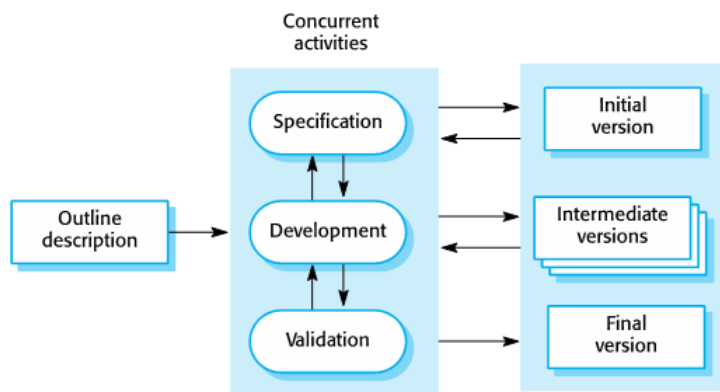

Section 01

Assignment 2

Professor Rawlins

19 May 2025

Incremental Model

1. First Version: Users should be able to set and print names and ID numbers. (week 2)
2. Second Version: Students should be able to add/drop courses to their schedule, view their schedule and search courses offered at WIT. This is where databases should be implemented. (~week 5)
3. Instructors should be able to print class lists, print which classes they are teaching, and print their schedule. Admin should be able to add/remove students from a course, (~week 6)
4. Implement that the system should include multiple semesters, print-out of schedule, scheduling preferences. (Week 11)
5. Final: Everything is tied together, resulting in a full system with the proper capabilities. (~week 11)
