Computer Networks for Engineers
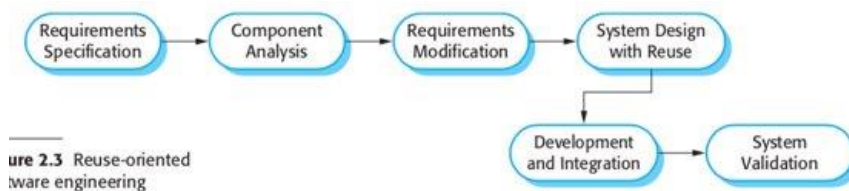

Section 01

Assignment 2

Professor Rawlins

19 May 2025

Integration and Configuration Model

ure 2.3 Reuse-oriented
tware engineering

1. Component Analysis: The real version of Leopard Web is one of the best places to get the information from this project for.

2. Requirement Modification: We will take the components we make and see how we can use them to satisfy the needs of the user (someone using Leopard Web).

3. System Design with Reuse: This is where we will start using the components we made for the system, modifying them as we go.

4. Development and Integration: Continue to edit the system and continue to update it with our new changes as we go.
